

**Remarks:**

In this Supplementary Amendment, Applicant has amended the title to indicate the correct title "Method of Mixing a Sample with a Reagent in a Chemistry Analyzer."

Applicant has also amended the "related applications" paragraph on page 1, line 2 to correct the error of a typographical nature regarding the related applications and the dates that they were filed. The amended related applications, to which the present application claims priority, were unintentionally left out of the previous supplementary amendment. Applicant has now correctly indicated that the present application is a divisional of serial number 10/141,377 which is a divisional of serial number 09/664,704, which was a continuation of application of PCT/CA99/00236, which claimed the benefit of provisional application serial no. 60/078,780. The provisional application and PCT priority dates were correctly noted in the parent application (09/664,704), which was incorporated by reference in the present application. Accordingly, Applicant asserts that the priority claim for the present application is now correctly set forth in the "related applications" paragraph of the specification.

Any fee which is due in connection with this amendment should be applied against our Deposit Account No. 19-0522.

In view of the foregoing, a Notice of Allowance appears to be in order and such is courteously solicited.

Respectfully submitted,

By
